

# RKD polypipe®

## MAIN CHARACTERISTICS

Virgin high-density polyethylene internal tubing, for all section tubes even in section coupling.  
Robust sprinkler outlet without leaks, easy to maintain.

Water resistant coating with high content of corrosive agents such as:

- Sulphates.
- Calcium.
- Iron.
- Salts.
- Fertilizers.
- Phytosanitary treatments.
- Slurry.
- Sewage water.
- Polyethylene resistant to abrasion to suspended solids.

## ADVANTAGE

Extends the life of the irrigation system.  
Saves cultivation costs by allowing the use of irrigation equipment to distribute fertilizers, chemical treatments, manure.

Ready for industrial applications such as mining plants, treatment plants, etc.
